INTRODUCTION

The Copyright to this document belongs to NLT Technologies, Ltd. (hereinafter called "NLT"). No part of this document will be used, reproduced or copied without prior written consent of NLT.

NLT does and will not assume any liability for infringement of patents, copyrights or other intellectual property rights of any third party arising out of or in connection with application of the products described herein except for that directly attributable to mechanisms and workmanship thereof. No license, express or implied, is granted under any patent, copyright or other intellectual property right of NLT.

Some electronic products would fail or malfunction at a certain rate. In spite of every effort to enhance reliability of products by NLT, the possibility of failures and malfunction might not be avoided entirely. To prevent the risks of damage to death, human bodily injury or other property arising out thereof or in connection therewith, each customer is required to take sufficient measures in its safety designs and plans including, but not limited to, redundant system, fire-containment and anti-failure.

The products are classified into three grades: "Standard", "Special", and "Specific".

Each quality grade is designed for applications described below. Any customer who intends to use a product for application other than that of Standard is required to contact an NLT sales representative in advance.

The Standard: Applications as any failure, malfunction or error of the products are free from any damage to death, human bodily injury or other property (Products Safety Issue) and not related the safety of the public (Social Issues), like general electric devices.

Examples: Office equipment, audio and visual equipment, communication equipment, test and measurement equipment, personal electronic equipment, home electronic appliances, car navigation system (with no vehicle control functions), seat entertainment monitor for vehicles and airplanes, fish finder (except marine radar integrated type), PDA, etc.

The Special: Applications as any failure, malfunction or error of the products might directly cause any damage to death, human bodily injury or other property (Products Safety Issue) and the safety of the public (Social Issues) and required high level reliability by conventional wisdom.

Examples: Vehicle/train/ship control system, traffic signals system, traffic information control system, air traffic control system, surgery/operation equipment monitor, disaster/crime prevention system, etc.

The Specific: Applications as any failure, malfunction or error of the products might severely cause any damage to death, human bodily injury or other property (Products Safety Issue) and the safety of the public (Social Issues) and developed, designed and manufactured in accordance with the standards or quality assurance program designated by the customer who requires extremely high level reliability and quality.

Examples: Aerospace system (except seat entertainment monitor), nuclear control system, life support system, etc.

The quality grade of this product is the "Standard" unless otherwise specified in this document.

1. OUTLINE

1.1 STRUCTURE AND PRINCIPLE

Color LCD module NL10276BC24-21F is composed of the amorphous silicon thin film transistor liquid crystal display (a-Si TFT LCD) panel structure with driver LSIs for driving the TFT (Thin Film Transistor) array and a backlight.

The a-Si TFT LCD panel structure is injected liquid crystal material into a narrow gap between the TFT array glass substrate and a color-filter glass substrate.

Color (Red, Green, Blue) data signals from a host system (e.g. signal generator, etc.) are modulated into best form for active matrix system by a signal processing board, and sent to the driver LSIs which drive the individual TFT arrays.

The TFT array as an electro-optical switch regulates the amount of transmitted light from the backlight assembly, when it is controlled by data signals. Color images are created by regulating the amount of transmitted light through the TFT array of red, green and blue dots.

1.2 APPLICATION

- For industrial use

1.3 FEATURES

- Long life LED backlight type
- High luminance
- High contrast
- Wide viewing angle
- Wide temperature range
- LVDS interface
- Reversible-scan direction
- Selectable 8bit or 6bit digital signals for data of RGB
- Replaceable lamp for backlight
- Acquisition product for UL60950-1/CSA C22.2 No.60950-1-03 (File number: E170632)
- Compliant with the European RoHS directive (2011/65/EU)

NLT Technologies, Ltd.**NL10276BC24-21F****2. GENERAL SPECIFICATIONS**

<i>Display area</i>	245.76 (H) × 184.32 (V) mm	
<i>Diagonal size of display</i>	31cm (12.1 inches)	
<i>Drive system</i>	a-Si TFT active matrix	
<i>Display color</i>	16,777,216 colors (At 8-bit input, FRC terminal= High) 262,144 colors (At 6-bit input, FRC terminal= Low or Open)	
<i>Pixel</i>	1,024 (H) × 768 (V) pixels	
<i>Pixel arrangement</i>	RGB (Red dot, Green dot, Blue dot) vertical stripe	
<i>Dot pitch</i>	0.08 (H) × 0.24 (V) mm	
<i>Pixel pitch</i>	0.24 (H) × 0.24 (V) mm	
<i>Module size</i>	260.5 (W) × 203.0 (H) × 8.7 (D) mm (typ.)	
<i>Weight</i>	490 g (typ.)	
<i>Contrast ratio</i>	900:1 (typ.)	
<i>Viewing angle</i>	<p>At the contrast ratio ≥10:1</p> <ul style="list-style-type: none"> • Horizontal: Right side 80° (typ.), Left side 80° (typ.) • Vertical: Up side 80° (typ.), Down side 80° (typ.)

NLT Technologies, Ltd.**NL10276BC24-21F****4.3.2 Backlight lamp****(1) Luminance 1: 800cd/m² (typ.)**

(Ta= 25°C, Note1, Note2, Note3, Note4)

Parameter	Symbol	min.	typ.	max.	Unit	Remarks
Forward current	IL	-	50.0	55.0	mA	-
Forward Voltage	VL	21.2	24.0	27.2	V	Ta= +25°C at IL= 50 mA /One circuit
		19.0	-	-	V	Ta= +60°C at IL= 50 mA /One circuit
		-	-	29.8	V	Ta= -30°C at IL= 50 mA /One circuit
		-	-	30.1	V	Ta= -30°C at IL= 55 mA /One circuit

(2) Luminance 2: 1000cd/m² (typ.)

(Ta= 25°C, Note1, Note2, Note3, Note4)

Parameter	Symbol	min.	typ.	max.	Unit	Remarks
Forward current	IL	-	70.0	77.0	mA	-
Forward Voltage	VL	22.0	23.1	28.3	V	Ta= +25°C at IL= 70 mA /One circuit
		20.3	-	-	V	Ta= +60°C at IL= 70 mA /One circuit
		-	-	31.1	V	Ta= -30°C at IL= 70 mA /One circuit
		-	-	31.4	V	Ta= -30°C at IL= 77 mA /One circuit

Note1: Please drive with constant current.

Note2: The above specifications are for one LED circuit of the backlight.

Note3: The Luminance uniformity may be changed depending on the current variation between 5 circuits. It is recommended that the current value difference amongst the circuits be less than 5%.

NLT Technologies, Ltd.**NL10276BC24-21F**

Note4: Forward Current vs Luminance / Operating temperature

4.3.3 Power supply voltage ripple

This product works if the ripple voltage levels are over the permissible values as the following table, but there might be noise on the display image.

Power supply voltage		Ripple voltage (Measure at input terminal of power supply)	Notel	Unit
VCC	3.3V	≤ 100		mVp-p

Notel: The permissible ripple voltage includes spike noise.

4.3.4 Fuse

Parameter	Fuse		Rating	Fusing current	Remarks
	Type	Supplier			
VCC	FCC16202AB	KAMAYA ELECTRIC Co., Ltd.	2.0A	4.0A	Notel
			3.6V		

Notel: The power supply's rated current must be more than the fusing current. If it is less than the fusing current, the fuse may not blow in a short time, and then nasty smell, smoke and so on may occur.

NLT Technologies, Ltd.**NL10276BC24-21F****4.4 POWER SUPPLY VOLTAGE SEQUENCE****4.4.1 LCD panel signal processing board**

* These signals should be measured at the terminal of 100Ω resistance.

Note1: If there is a voltage variation (voltage drop) at the rising edge of VCC below 3.0V, there is a possibility that a product does not work due to a protection circuit.

Note2: Display signals (D0+/-, D1+/-, D2+/-, D3+/- and CLK+/-) and function signals (DPS, FRC and MSL) must be set to Low or High-impedance, except the VALID period (See above sequence diagram), in order to avoid the circuitry damage.

If some of display and function signals of this product are cut while this product is working, even if the signal input to it once again, it might not work normally. If a customer stops the display and function signals, VCC also must be shut down.

4.4.2 LED driver board

Note1: These are the display and function signals for LCD panel signal processing board.

Note2: The backlight should be turned on within the valid period of display and function signals, in order to avoid unstable data display.

NLT Technologies, Ltd.

NL10276BC24-21F

4.7 DISPLAY POSITIONS

The following table is the coordinates per pixel (See "4.8 SCANNING DIRECTIONS").

C (0, 0)								
R	G	B						
C(0, 0)	C(1, 0)	...	C(X, 0)	...	C(1022, 0)	C(1023, 0)		
C(0, 1)	C(1, 1)	...	C(X, 1)	...	C(1022, 1)	C(1023, 1)		
...
...
C(0, Y)	C(1, Y)	...	C(X, Y)	...	C(1022, Y)	C(1023, Y)		
...
C(0, 766)	C(1, 766)	...	C(X, 766)	...	C(1022, 766)	C(1023, 766)		
C(0, 767)	C(1, 767)	...	C(X, 767)	...	C(1022, 767)	C(1023, 767)		

4.8 SCANNING DIRECTIONS

The following figures are seen from a front view.

Figure1. Normal scan (DPS: Low or Open)

Figure2. Reverse scan (DPS: High)

Notel: Meaning of C (X, Y) and D (X, Y)

C (X, Y): The coordinates of the display position (See "4.7 DISPLAY POSITIONS".)

D (X, Y): The data number of input signal for LCD panel signal processing board

NLT Technologies, Ltd.

4.9 INPUT SIGNAL TIMINGS

4.9.1 Outline of input signal timings

- Horizontal signal

Note1

- Vertical signal

Note1

Note1: This diagram indicates virtual signal for set up to timing.

Note2: See "4.9.3 Input signal timing chart" for the pulse number.

NLT Technologies, Ltd.**NL10276BC24-21F****4.9.2 Timing characteristics**

(Note1, Note2, Note3)

Parameter		Symbol	min.	typ.	max.	Unit	Remarks	
CLK	Frequency	1/t _c	60.0	65.0	68.0	MHz	15.385ns (typ.)	
	Duty	-	-	-	-	-	-	
	Rise time, Fall time	-	-	-	-	ns	-	
DATA	CLK-DATA	Setup time	-	-	-	ns	-	
		Hold time	-	-	-	ns	-	
		Rise time, Fall time	-	-	-	ns	-	
DE	Horizontal	Cycle	th	19.67	20.676	22.4	μs	48.363kHz (typ.)
				-	1,344	-	CLK	-
	Vertical (One frame)	Cycle	tv	-	1,024	-	CLK	-
				13.3	16.666	18.5	ms	60.0Hz (typ.)
				780	806	-	H	-
	CLK-DE	Setup time	-	-	-	ns	-	
		Hold time	-	-	-	ns	-	
	Rise time, Fall time		-	-	-	ns	-	

Note1: Definition of parameters is as follows.

t_c= 1CLK, th= 1H

Note2: See the data sheet of LVDS transmitter.

Note3: Vertical cycle (tv) should be specified in integral multiple of Horizontal cycle (th).

Color gamut	6R= 0°, 6L= 0°, 6U= 0°, 6D= 0° at center, against NTSC color space	C	35	40	-	%		
Response time	White to Black	Ton	-	3	5	ms	BM-5A	Note8 Note9
	Black to White	Toff	-	15	21	ms		
Viewing angle	Right	6U= 0°, 6D= 0°, CR≥ 10	6R	70	80	-	EZ Contrast	Note10
	Left	6U= 0°, 6D= 0°, CR≥ 10	6L	70	80	-		
	Up	6R= 0°, 6L= 0°, CR≥ 10	6U	70	80	-		
	Down	6R= 0°, 6L= 0°, CR≥ 10	6D	70	80	-		

Note1: These are initial characteristics.

Note2: Measurement conditions are as follows.

Ta= 25°C, VCC= 3.3V, IL= 50mA and 70mA / One circuit, Display mode: XGA,
Horizontal cycle= 1/48.363kHz, Vertical cycle= 1/60.0Hz,
DPS= Low or Open: Normal scan

Optical characteristics are measured at luminance saturation 20minutes after the product works in the dark room. Also measurement methods are as follows.

Note3: At IL= 50mA/One circuit

Note4: At IL= 70mA/One circuit

Note5: See "4.10.2 Definition of contrast ratio".

Note6: See "4.10.3 Definition of luminance uniformity".

Note7: These coordinates are found on CIE 1931 chromaticity diagram.

Note8: Product surface temperature: TopF= 30 °C

Note9: See "4.10.4 Definition of response times".

Note10: See "4.10.5 Definition of viewing angles".

NLT Technologies, Ltd.

NL10276BC24-21F

4.10.2 Definition of contrast ratio

The contrast ratio is calculated by using the following formula.

$$\text{Contrast ratio (CR)} = \frac{\text{Luminance of white screen}}{\text{Luminance of black screen}}$$

4.10.3 Definition of luminance uniformity

The luminance uniformity is calculated by using following formula.

$$\text{Luminance uniformity (LU)} = \frac{\text{Maximum luminance from } \textcircled{1} \text{ to } \textcircled{5}}{\text{Minimum luminance from } \textcircled{1} \text{ to } \textcircled{5}}$$

The luminance is measured at near the 5 points shown below.

4.10.4 Definition of response times

Response time is measured at the time when the luminance changes from "white" to "black", or "black" to "white" on the same screen point, by photo-detector. Ton is the time when the luminance changes from 90% down to 10%. Also Toff is the time when the luminance changes from 10% up to 90% (See the following diagram.).

4.10.5 Definition of viewing angles

NLT Technologies, Ltd.**NL10276BC24-21F****5. ESTIMATED LUMINANCE LIFETIME**

The luminance lifetime is the time from initial luminance to half-luminance.

This lifetime is the estimated value, and is not guarantee value.

(1) Luminance 1: 800cd/m² (typ.)

Condition		Estimated luminance lifetime (Life time expectancy) Note1, Note2, Note3	Unit
LED elementary substance	25°C (Ambient temperature of the product) Continuous operation, IL= 50mA/One circuit	70,000	h
	80°C (Surface temperature at screen) Continuous operation, IL= 50mA/One circuit	60,000	

(2) Luminance 2: 1000cd/m² (typ.)

Condition		Estimated luminance lifetime (Life time expectancy) Note1, Note2, Note3	Unit
LED elementary substance	25°C (Ambient temperature of the product) Continuous operation, IL= 70mA/One circuit	60,000	h
	60°C (Surface temperature at screen) Continuous operation, IL= 70mA/One circuit	-	

Note1: Life time expectancy is mean time to half-luminance.

Note2: Estimated luminance lifetime is not the value for LCD module but the value for LED elementary substance.

Note3: By ambient temperature, the lifetime changes particularly. Especially in case the product works under high temperature environment, the lifetime becomes short.

NLT Technologies, Ltd.**NL10276BC24-21F****6. RELIABILITY TESTS**

Test item	Condition	Judgment	Note1
High temperature and humidity (Operation)	① $60 \pm 2^\circ\text{C}$, RH= 90%, 240hours. ② Display data is black.		
High temperature (Operation)	① $80 \pm 3^\circ\text{C}$, 240hours ② Display data is black.		
Heat cycle (Operation)	① $-30 \pm 3^\circ\text{C} \dots 1\text{hour}$ $80 \pm 3^\circ\text{C} \dots 1\text{hour}$ ② 50cycles, 4 hours/cycle ③ Display data is black.		
Thermal shock (Non operation)	① $-30 \pm 3^\circ\text{C} \dots 30\text{minutes}$ $80 \pm 3^\circ\text{C} \dots 30\text{minutes}$ ② 100cycles, 1hour/cycle ③ Temperature transition time is within 5 minutes.	No display malfunctions	
ESD (Operation)	① 150pF, 150Ω, $\pm 10\text{kV}$ ② 9 places on a panel surface Note2 ③ 10 times each places at 1 sec interval		
Dust (Operation)	① Sample dust: No. 15 (by JIS-Z8901) ② 15 seconds stir ③ 8 times; repeat at 1 hour interval		
Vibration (Non operation)	① 5 to 100Hz, 19.6m/s^2 ② 1 minute/cycle ③ X, Y, Z directions ④ 120 times; each directions	No display malfunctions	
Mechanical shock (Non operation)	① 539m/s^2 , 11ms ② $\pm X, \pm Y, \pm Z$ directions ③ 5 times; each directions	No physical damages	

Note1: Display and appearance are checked under environmental conditions equivalent to the inspection conditions of defect criteria.

Note2: See the following figure for discharge points.

NLT Technologies, Ltd.

NL10276BC24-21F

7. PRECAUTIONS

7.1 MEANING OF CAUTION SIGNS

The following caution signs have very important meaning. Be sure to read "7.2 CAUTIONS" and "7.3 ATTENTIONS"!

This sign has the meaning that a customer will be injured or the product will sustain damage if the customer practices wrong operations.

This sign has the meaning that a customer will be injured if the customer practices wrong operations.

7.2 CAUTIONS

- Do not shock and press the LCD panel and the backlight! There is a danger of breaking, because they are made of glass. (Shock: Equal to or no greater than 539m/s^2 and equal to or no greater than 11ms, Pressure: Equal to or no greater than 19.6 N ($\phi 16\text{mm}$ jig))

7.3 ATTENTIONS

7.3.1 Handling of the product

- ① Take hold of both ends without touching the circuit board when the product (LCD module) is picked up from inner packing box to avoid broken down or misadjustment, because of stress to mounting parts on the circuit board.
- ② When the product is put on the table temporarily, display surface must be placed downward.
- ③ When handling the product, take the measures of electrostatic discharge with such as earth band, ionic shower and so on, because the product may be damaged by electrostatic.
- ④ The torque for product mounting screws must never exceed $0.23\text{N}\cdot\text{m}$. Higher torque might result in distortion of the bezel. And the length of product mounting screws must be $\leq 2.0\text{mm}$.
- ⑤ The product must be installed using mounting holes without undue stress such as bends or twist (See outline drawings). And do not add undue stress to any portion (such as bezel flat area). Bends or twist described above and undue stress to any portion may cause display mura.
- ⑥ Do not press or rub on the sensitive product surface. When cleaning the product surface, wipe it with a soft dry cloth.
- ⑦ Do not push or pull the interface connectors while the product is working.
- ⑧ When handling the product, use of an original protection sheet on the product surface (polarizer) is recommended for protection of product surface. Adhesive type protection sheet may change color or characteristics of the polarizer.
- ⑨ Usually liquid crystals don't leak through the breakage of glasses because of the surface tension of thin layer and the construction of LCD panel. But, if you contact with liquid crystal by any chance, please wash it away with soap and water.

NLT Technologies, Ltd.

NL10276BC24-21F

7.3.2 Environment

- ① Do not operate or store in high temperature, high humidity, dewdrop atmosphere or corrosive gases. Keep the product in packing box with antistatic pouch in room temperature to avoid dusts and sunlight, when storing the product.
- ② In order to prevent dew condensation occurred by temperature difference, the product packing box must be opened after enough time being left under the environment of an unpacking room. Evaluate the storage time sufficiently because dew condensation is affected by the environmental temperature and humidity. (Recommended leaving time: 6 hours or more with the original packing state after a customer receives the package)
- ③ Do not operate in high magnetic field. If not, circuit boards may be broken.
- ④ This product is not designed as radiation hardened.

7.3.3 Characteristics

The following items are neither defects nor failures.

- ① Characteristics of the LCD (such as response time, luminance, color uniformity and so on) may be changed depending on ambient temperature. If the product is stored under condition of low temperature for a long time, it may cause display mura. In this case, the product should be operated after enough time being left under condition of operating temperature.
- ② Display mura, flickering, vertical streams or tiny spots may be observed depending on display patterns.
- ③ Do not display the fixed pattern for a long time because it may cause image sticking. Use a screen saver, if the fixed pattern is displayed on the screen.
- ④ The display color may be changed depending on viewing angle because of the use of condenser sheet in the backlight.
- ⑤ Optical characteristics may be changed depending on input signal timings.

7.3.4 Others

- ① All VCC and GND terminals should be used without any non-connected lines.
- ② Do not disassemble a product or adjust variable resistors.
- ③ See "REPLACEMENT MANUAL FOR LAMP HOLDER SET", when replacing lamp holder set.
- ④ Pack the product with the original shipping package, in order to avoid any damages during transportation, when returning the product to NLT for repairing and so on.
- ⑤ The information of China RoHS directive six hazardous substances or elements in this product is as follows.

China RoHS directive six hazardous substances or elements					
Lead (Pb)	Mercury (Hg)	Cadmium (Cd)	Hexavalent Chromium (Cr VI)	Polybrominated Biphenyls (PBB)	Polybrominated Biphenyl Ethers (PBDE)
×	○	○	○	○	○

Note: ○ : This indicates that the poisonous or harmful material in all the homogeneous materials for this part is equal or below the limitation level of SJ/T11363-2006 standard regulation.

× : This indicates that the poisonous or harmful material in all the homogeneous materials for this part is above the limitation level of SJ/T11363-2006 standard regulation.
